DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required

under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a lightbulb, classified in class 362, subclass 255.
- II. Claims 12-22, drawn to a lighting fixture, classified in class 362, subclass 293.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are a light bulb with a photosensitive sheet (Invention I) and a lighting fixture with a photosensitive lens.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3406

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
